

ATLANTIC SHELL STONE

Atlantic Shell Stone by Coral Classics

Atlantic Shell Stone is a true shell stone. Each piece is swirled with shells throughout, and it is even in tone and shade. Being a true shell stone, Atlantic Shell Stone is naturally cool to the touch regardless of the heat exposure it is exposed to.

For mud set over concrete slab as well as pavers for standard residential sand set applications.

ARCHITECTURAL PRODUCTS

Atlantic Shell Stone can be fabricated into just about anything from balusters and handrails to fireplaces, columns, moldings, door and window surrounds, bases, tables, cut to size and more....

SEALING

Atlantic Shell Stone is a porous stone that should be sealed with a high quality penetrating stone or marble sealer to close its pores and keep it from staining or attracting mold or mildew and allow it to be easily maintained. We recommend "Stain Proof by Dry Treat" sealer, for all interior and exterior applications. (refer to sealer page)
