

SEASHELL CORAL

Seashell Coral by Coral Classics

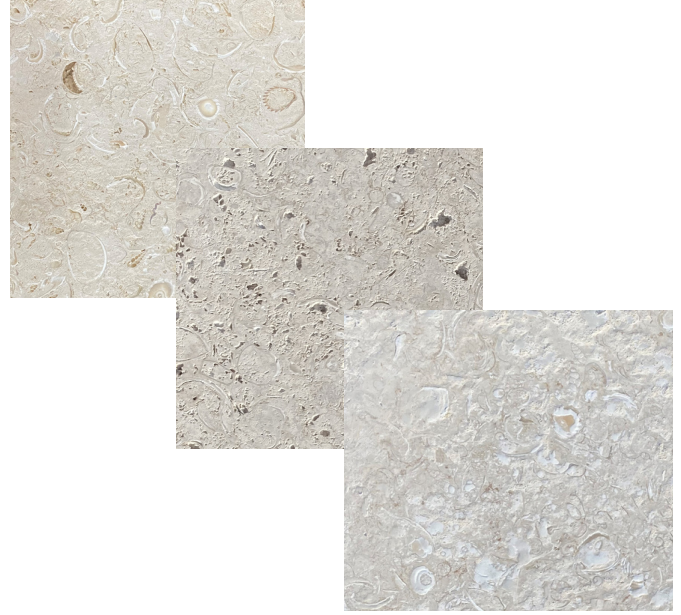

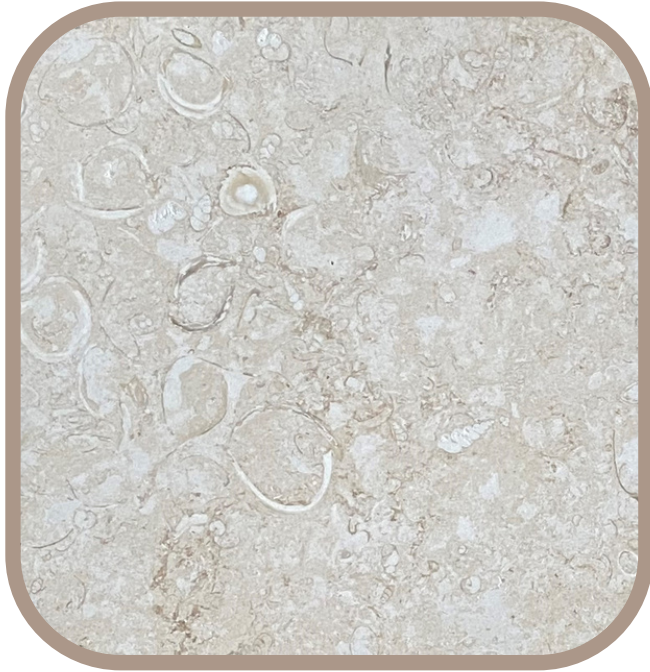

In Saw Cut Unfilled, Seashell Coral is naturally Non-Slip. For this reason, it is an ideal product to use on any type of exterior application, sand set or mud set. Other finishes such as Brushed & Honed & Filled can also be used for exterior. In the Honed & Filled Finish or Brushed & Filled finish, Seashell Coral can be used for interior applications. It is also suitable for interior or exterior cladding in any finish.

For Architectural Elements, Seashell Coral can be fabricated into a variety of different products such as fireplaces, columns, window and door surrounds, balusters, 3D designs, convex and concave pieces, moldings, mosaics, pool copings, tables, bases, and more. Just about anything that can be drawn can be manufactured out of Seashell Coral.
